

EduDash_Content

The image shows a geography lesson plan for Monday, November 10, 2025. The main points covered include:

- Weather should be read from a weather map to identify weather forecast and report.
- New words: P46. All the new words.
- Uses of coal (Pg. 75 and 76).
- How coal is formed (Pg. 74).
- Mining and the environment (Pg. 78, 81, and 82).
- Paragraph writing study (Pg. 81 and 82).

This appears to be a lesson plan or curriculum guide covering various geography topics related to weather, resources, and environmental impacts. The specific details and page references suggest this is part of a broader geography curriculum for students.
